To be covered by the Cabot OR registration, **customers are required to regularly provide the Cabot OR with information as described in the REACH Regulation**, in particular, the name/address of each EU customer to be covered by the Cabot OR registration, the tonnage of chemically surface CAB-O-JET® and IJX™ product(s) imported into the EU and its use(s). Should this information not be provided in due time or should this information not be accurate, Cabot's OR cannot cover the EU importer and the EU

importer will remain or become responsible for the compliance of its importation of Cabot's CAB-O-JET® and IJX™ product(s) under the REACH Regulation.

Substances of very high concern (SVHC) information

The European authorities continue to compile a **provisional list (Candidate List) of SVHC** which should be documented under the REACH Regulation, if present at a concentration greater than 0.1% in a chemical. A new list of SVHC has been published by [ECHA](#) on January 23rd, 2024.

As of the date of this statement, to the best of our knowledge, Cabot's CAB-O-JET® and IJX™ products do not contain any of the substances mentioned on this Candidate List above the threshold concentration.

According to Article 31.1 of the REACH Regulation, an SDS must be provided for hazardous substances or mixtures. We confirm that currently, Cabot's non-exclusive CAB-O-JET® and IJX™ products are not classified as hazardous by the EU authorities under the European Regulation 1272/2008/EC (CLP) and its amendments. Certain exclusive customer grades are classified as hazardous. Regardless of whether a Cabot product is classified as hazardous or not, an SDS is provided. The most current version of Cabot's non-exclusive product SDSs can be found on our [website](#).
